

"Dragons love ice cream
when it's hot outside
As a liquid, a solid, or even deep fried.
On top of a cone, in a cup or a bowl
They can slurp it, or lick it ,
or swallow it whole!"
Dragons love ice cream
come rain or come shine.
They dream about ice cream
all of the time.
At home or at school or out on the town,
Visions of ice cream are floating around."
